

Prop 65

Avanti Nut Company, Inc. only produces raw inshell and shelled walnuts. No Additional sulfites, chemicals, or other additives are added to our products. Incoming samples are taken from each grower and sent to a third-party certified lab for residue testing. All results shall be Non-Detected in order for the goods to be used. Walnuts are not known to cause cancer, birth defects, or other reproductive harm. If there are any questions related to our products, please contact our Quality Control/Food Safety department.

A handwritten signature in blue ink, appearing to read "Nina Solari".
